

ACHIEVING ZEN DURING A ROOT CANAL? CHALLENGE ACCEPTED.

Shaping • Cleaning • Obturation

WaveOne® Gold

EXPERIENCE THE CALMING CONFIDENCE OF WAVEONE® GOLD

Root canals can be challenging. But the WaveOne® Gold treatment solution has everything you need to approach your next case with calmness and tranquility. The result? An endodontic treatment that is a simpler (and more profitable) part of your practice. So go ahead – take on the next root canal case with confidence.

A comprehensive treatment solution in 3 simple steps.

SHAPING

Safe shaping in half the time.¹ A short sequence for most of your cases including 1 glidepath and 1 shaping file. Crafted to be more forgiving, due to reciprocating motion and gold heat treatment.²

CLEANING

Efficient cleaning. That's what the irrigation needle as well as the EndoActivator® are designed for.

OBTURATION

Biocompatible seal and optimal fit. No matter if you prefer a warm or cold obturation technique our biocompatible Bioceramic Sealer supports both. Enjoy the ease with Conform Fit® GuttaPercha (cold) or GuttaCore® (warm).

DS MOTORS

Because every angle, every acceleration, every speed matters to deliver the best, our motors provide the genuine reciprocating movement for WaveOne® Gold.

1. vs. ProTaper® Universal
2. vs. conventional systems

SHAPING

CHALLENGE:

SAFE SHAPING IN HALF THE TIME.¹

**One short sequence
for most of your cases²**

Simple to use and easy to adopt

- Short learning curve³
- Good control of instrument progression⁴

Time-saving

- Halves shaping time¹
- Zeros out reprocessing & documentation
- Optimal cutting efficiency⁵

Safety. A priority.

- Forgiving due to reciprocating motion and gold heat treatment
- Up to 200 scientific studies
- More than 30 million treated cases

WaveOne® Gold

BUILDING ON
MAILLEFER
HERITAGE

1. vs. ProTaper Universal

2. Single glide path file and single shaping file in most of the cases

3. User evaluation

4. vs. WaveOne

5. Higher cutting efficiency than WaveOne and cutting efficiency preserved thanks to single-use

CLEANING

CHALLENGE:
**EFFICIENT
CLEANING.**

IRRIGATION NEEDLE

Efficient

- Advanced technology with two lateral openings aimed directly at the dentinal walls
- Soft polypropylene allows the needle to curve and to deliver irrigation solution close to the apex

Safe

- Closed end reduces risk of extrusion at the apex
- Plastic body makes it atraumatic for hard tissues

ENDOACTIVATOR®

More opened dentinal tubules

Passive soaks aren't enough. Activating irrigant solution produces a surface with more opened dentinal tubules, providing better obturation of lateral and accessory canals.⁶

Unactivated
dentin surface

After irrigant
activation

6. A quantitative and qualitative analysis of ultrasonic versus sonic endodontic systems on canal cleanliness and obturation Valerie Kanter, DMD, Emily Weldon, DMD, Uma Nair, DMD, MDS, Claudio Varella, DDS, MS, Keith Kanter, DDS, Kenneth Anusavice, PhD, and Roberta Pileggi, DDS, MS, Gainesville, FL UNIVERSITY OF FLORIDA. (Oral Surg Oral Med Oral Pathol Oral Radiol Endod 2011;112:809-813). Support Claim 4.

OBTURATION

CHALLENGE:

**BIOCOMPATIBLE SEAL
AND OPTIMAL FIT.**

AH PLUS® BIOCERAMIC SEALER

Biocompatible

Providing an ideal environment for Hydroxyapatite formation paving the way for the body's self healing.⁷

Adapting to your preference

Compatible with cold and warm obturation techniques.

Cold Obturation

CONFORM FIT® GUTTA-PERCHA

- Take advantage of the unsurpassed fit of the injection-moulded Conform Fit® Gutta-Percha points that match the unique shapes created by our WaveOne® Gold files.⁷
- Convenient tab and color markings for easy identification.

Warm Obturation

GUTTACORE®

- The confidence of a 3D fill, with the ease of a single insertion.
- Our obturators feature a cross-linked Gutta-percha core that sends the surrounding warm, flowable gutta-percha three-dimensionally to follow the natural canal anatomy.

Superior apical gutta-percha point filling volume⁷
